WORLD-CLASS NURSING EDUCATION FOR 21ST CENTURY HEALTH CARE

For more than 35 years, Rutgers–Camden has prepared students for baccalaureate-level nursing practice through its commitment to education, research, and service.

- Rutgers–Camden has the only four-year bachelor’s degree in nursing program in South Jersey powered by a research university.
- Nursing courses begin the first year and are taught by clinically expert faculty.
- Students receive personalized attention from nursing faculty who are leaders in nursing.
- Top hospitals and health care agencies in the Delaware Valley partner with Rutgers–Camden to provide challenging clinical experiences.
- The nursing program offers opportunities to build skills and knowledge through participation in research and service learning projects in the region and abroad.
Students are immersed in nursing education beginning in the first year. This dynamic program integrates nursing study with natural and social sciences, arts, and humanities courses, while developing nursing knowledge and skills throughout the curriculum.

The Bachelor of Science in Nursing degree prepares students for success as professional nurses who are critical thinkers and knowledgeable providers of health promotion, disease prevention, and care of individuals, families, and communities locally, nationally, and globally.

Nursing faculty are award-winning teachers, scientists, and clinicians. Experts in their fields of nursing, faculty encourage students to be creative, think critically, and solve complex problems. Students receive personalized attention from faculty who are professional nurses and understand the multifaceted roles and functions of nurses.

As a nursing student you are going to be transformed: intellectually, emotionally, and socially.

Your nursing education at Rutgers–Camden will be extremely challenging but deeply rewarding. You will develop the tools to make a meaningful difference in the world as you learn to assess problems, develop and implement solutions, and evaluate outcomes.

The first-year curriculum includes courses in the sciences, social sciences, and a seminar on professional nursing.

The second-year curriculum continues with anatomy and physiology, microbiology, nutrition, humanities, and nursing courses that examine wellness and teach health assessment and basic clinical skills.

The third and fourth years of the curriculum include pathophysiology, pharmacology, research, and clinical courses in adult health, care of women and children, gerontology, psychiatric/mental health, community health, and leadership.

PROFESSIONAL NURSES ARE THE FOUNDATION OF A STRONG AND VITAL HEALTH CARE SYSTEM.

The Rutgers School of Nursing at Camden is committed to preparing professional nurses who are critical thinkers and knowledgeable providers of health promotion, disease prevention, and care of individuals, families, and communities locally, nationally, and globally.
